

Elevate Your Wireless Experience with Flow

Experience bespoke wireless solutions tailored to your organisation's unique demands. At Flow, we excel at optimising networks for global enterprises through meticulous surveys and dedicated support. Our approach ensures you get the best wireless experience for your users. We strive to deliver flawless, high-performing networks that are unique, solid, and dependable, without exception.

Our Professional Wireless Surveys

Passive Surveys

Optimise your wireless network performance. Our hassle-free surveys identify issues in your setup, ensuring an optimal experience without undue costs.

Active Surveys

Get real-time network insights. From quick connectivity checks to detailed analysis, our active surveys offer valuable data for informed decisions.

Predictive Surveys

Perfect for remote projects, our predictive surveys provide a tailored, cost-effective solution for predicting wireless performance to enhance your network design.

We offer a range of tailored site surveys, including AP-on-a-Stick, Passive, Active, Validation, Predictive, Hybrid, Architecture and Post-deployment surveys to meet your organisation's specific wireless networking needs.

In-Depth Analysis with Ekahau

Harnessing the power of the industry-leading Ekahau Site Survey, we delve into an in-depth analysis to offer precise insights into your network's performance. Our proficiency with Ekahau ensures the delivery of comprehensive reports and actionable recommendations, streamlining the process of upgrades and maintenance for optimal efficiency.

Why choose Flow?

We simplify wireless networking with customised site surveys and expert analysis. Our Passive, Active, and Predictive surveys form the core of our service offerings, tailored to provide optimal WiFi coverage, performance and reliability for your unique environment.

Optimising Network Security

At Flow, we meticulously evaluate WiFi signals, access points, and potential interference, identifying vulnerabilities and providing precise analysis.

Why Choose Our Wireless Surveys:

Comprehensive Assessments

Evaluate every aspect of your network for optimal performance and security.

Proven Cost Reduction

Designed to save you money by streamlining processes and eliminating unnecessary expenses.

Enhanced Productivity

Empowering your team with seamless, reliable network connectivity, boosting productivity.

User Satisfaction

Fostering a positive work environment through enhanced user experience and collaboration.

Tailored Solutions

Customising security strategies based on specific needs for maximum efficiency.

Critical Steps in Wireless Surveys

-  **Planning and Site Analysis:** Assess site readiness, access points, and permissions.
-  **Survey Execution and Data Collection:** Conduct surveys, collect vital Wi-Fi data.
-  **Data Analysis and Vulnerability Identification:** Identify weaknesses for targeted solutions.
-  **Implementation of Security Measures:** Deploy solutions based on survey findings.
-  **Monitoring and Support:** Ensure optimal security and performance.

Why Wait?

Our flexible approach ensures optimal WiFi coverage, performance, security and reliability - whether for busy offices or manufacturing facilities. Our technicians carefully execute each survey, delivering faster speeds, fewer dead zones, and less downtime. Our inclusive post-deployment support ensures seamless integration for thriving networks.
